cnect®
PREMIER CONTRACTED AFFILIATE

REMOTE CARE MADE SIMPLE

From your patient's
home to your EHR
in just a few steps.

CareSimple® simplifies remote patient monitoring (RPM) for virtually all patients.

Delivered directly to your patients and integrated with more than 85 EHRs, the platform provides the software, hardware, connectivity and logistics you need to implement population health-driven remote patient monitoring.

Simplifying RPM for virtually all patients.

- ✓ No app download
- ✓ No hub or WiFi
- ✓ No pairing or setup

If you've tried RPM you've likely faced many challenges like purchasing hubs, provisioning tablets, pairing peripherals, setting up patients, troubleshooting connectivity issues, and spending countless hours on technical support. These are good reasons to be concerned about scalability.

CareSimple is all about removing these problems, taking out the technical and operational complexities that are typically associated with RPM.

Delivered To Your Patients

Devices are pre-configured and shipped directly to your patients

Blood Pressure Monitor

Body Weight Scale

Blood Glucose Monitor
