

Supporting the unique needs of women, with customized solutions for every stage of life

Women's Health

From reproductive health to cervical cancer screening, women have unique healthcare needs. Recognizing that women's health outcomes are shaped by a number of factors, including access, affordability, social determinants of health, and discrimination,¹ health centers like yours go above and beyond to give women the support they need at every step of the healthcare journey. We can help, with testing solutions for all phases of a woman's life, supporting better patient outcomes and improved quality measure performance.

17.5M

In 2022, health centers served more than 17.5 million women²

↑ RISK

Women are at greater risk for insurance instability and loss, affecting access to care³

51%

More than half of hypertension deaths are among women; 57% of Black women have hypertension⁴

28%

Of women ages 18–64, 28% have had an STI test and 25% have had an HIV test, with lower percentages among Black women and women on Medicaid⁵

Delivering care for all stages of a woman's life requires testing you can rely on. We offer comprehensive solutions and expertise across multiple specialties.

Providing the insights you need to help improve quality metrics and patient outcomes in **women's health**
