

American Eagle
INSTRUMENTS®

Trusted Heritage. Quality Craftsmanship.

 **MADE IN MISSOULA, MT USA**

Every American Eagle Instrument begins with a visionary design and US-made steel that is expertly shaped and hand-honed by master craftsmen.

Used with pride by generations of dental professionals across the globe, American Eagle Instruments bestow a simple confidence and trusted heritage of US quality craftsmanship.

INSTRUMENT OPTIONS

XP® SHARPEN-FREE

Innovative XP technology features a wear-resistant edge that lasts as long or longer than traditional stainless steel without having to sharpen.

TALON TOUGH™ STAINLESS STEEL

Made from premium heat-treated stainless steel, our traditional instruments feature a sharp, long-lasting edge that allows for more time in between sharpening.

XP® SHARPEN-FREE THIN

The ideal instruments for tight interproximal contacts, narrow pockets, and periodontally involved cases, providing a greater tactile sensitivity.

QUIK-TIP™ CONE SOCKET SYSTEM

Designed with the hygienist in mind, Quik-Tips offer the availability to discard a single end when it becomes dull without having to replace your entire instrument. Available in both XP and stainless steel.

HANDLE OPTIONS

Available in 3/8" (9.5mm) Eaglelite® resin or stainless steel. Colored resin handles offer easier recognition of your specific instrument pattern.

RESIN

STAINLESS STEEL

TIP OPTIONS

Most scalers and curettes are available in Talon Tough stainless steel or in XP Sharpen-Free. Select patterns are available in XP Sharpen-Free only.

CURETTES

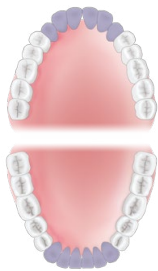

SCALERS

Stainless Steel

ALSO KNOWN AS TALON TOUGH™

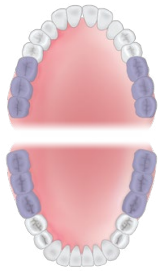

Talon Tough™ Instruments have set the standard for extraordinary quality and instrument design. Known for their superior alloy and exceptional surface finish, these instruments stay sharp longer and are easier to sharpen. The Eaglelite® resin handles are extremely light-weight and provide superior tactile feedback.

N1 SCALER

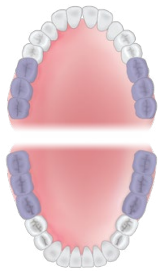

RDH Tip: The N1 Scaler offers two instruments in one. A spoon for easy anterior stain and calculus removal plus an anterior sickle for those tight interproximal spaces and anterior crowding.

204S SCALER

RDH Tip: Everyone knows the 204S. With a triangular shape/cross section, the 204S is perfect for adapting under contacts for those interproximal deposits.

BARNHART 5-6 CURETTE

RDH Tip: One of our most popular universal curettes, the Barnhart 5-6 offers the perfect terminal shank length for posterior, subgingival reach.

Blackjack with
Eaglelite® resin handle
SKU: AESBJX

Medical resin handles are half the weight of traditional stainless steel handles.

The unique knurl pattern gives you a secure grip without applying pinch force.

Longer shank for better access than comparable instrument designs

Strong heat-treated steel requires less sharpening

Our instrument artisans are trained to inspect instrument blades down to even 0.001 mm detail. That's the width of a strand of hair.

H6-7 SCALER

 AESH6-7X  AESH6-7Z

RDH Tip: Super-thin, contra-angle design that's highly effective in interproximal areas. Shank angulation provides accessibility to all anterior and premolar surfaces.

BLACKJACK SCALER

 AESBJX  AESBJZ

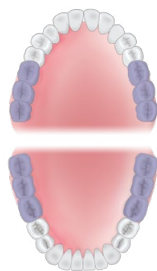

RDH Tip: If you love the PDT Montana Jack® or Hu-Friedy Nevi® 3 or Nevi® 4, then the Blackjack is for you. With an additional 4mm extension in the upper shank, it is a true universal sickle.

GRACEY 15-16 DEEP POCKET

 AEGDP15-16X  AEGDP15-16Z

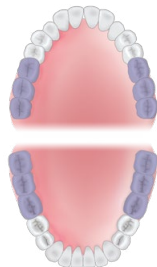

RDH Tip: The Gracey 15-16 Deep Pocket is perfect for periodontal scaling procedures. With an added 3mm of terminal shank, you can easily reach hard to access deposits. The modified bend in the shank allows for easier posterior adaptation than the Gracey 11-12.

COLUMBIA 13-14 CURETTE

 AECC13-14X  AECC13-14Z

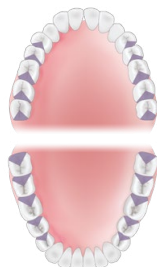

RDH Tip: This universal posterior curette is slightly broader, shorter, and features a more pronounced curve than the Barnhart 5-6. The rounded toe is great for lingual anterior stains and it adapts well in shallow pockets.

M23 SCALER

 AESM23X  AESM23Z

RDH Tip: Do you love a Barnhart 5-6 but wish it was a sickle? If so, you'll love the M23. With a longer terminal shank, you'll be able to access hard to reach interproximal spaces and adapt easily to posterior line angles.

GRACEY 13-14 DEEP POCKET

 AEGDP13-14X  AEGDP13-14Z

RDH Tip: The Gracey 13-14 Deep Pocket is perfect for periodontal scaling procedures. With an added 3mm of terminal shank, you can easily reach hard to access distal surfaces.

XP® Sharpen-Free

KEEP THE QUALITY, ELIMINATE THE SHARPENING

American Eagle Instruments, specifically XP Sharpen-Free instruments, have changed how I practice clinically and I will love them forever for that. My ergonomics are better, my patients are happier and healthier with the lighter shaving stroke, and **my practice is able to retain patients because of how much more they enjoy their hygiene appointment!**

Andrew Johnston, RDH

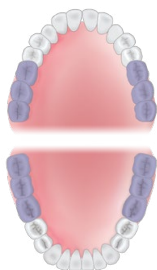

Co-host - A Tale of Two Hygienists Podcast

204S XP SCALER

 AES204SXPX  AES204SXPZ

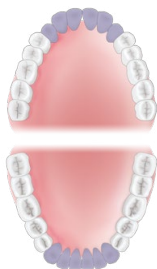

RDH Tip: Everyone knows the 204S. With a triangular shape/cross section, the 204S is perfect for adapting under contacts for interproximal deposits.

BARNHART 5-6 XP CURETTE

 AECB5-6XPX  AECB5-6XPZ

RDH Tip: One of our most popular universal curettes, the Barnhart 5-6 offers the perfect terminal shank length for posterior, subgingival reach.

BOGE 513 XP SCALER

 AESB513XPX  AESB513XPZ

RDH Tip: The Boge 513 is not only for ortho patients. It is ideal for large anterior ledges, direct buccals when doing a horizontal stroke, and even distals of second molars. If you love a Beavertail ultrasonic tip, the Boge 513 is for you.

Barnhart 5-6 with
Eagle/Ite® resin handle
SKU: AECB5-6XPX

Saves Time and Money:

XP Sharpen-Free instruments last as long as standard instruments, but without the need to sharpen. By eliminating the need for sharpening, time can be used for more productivity.

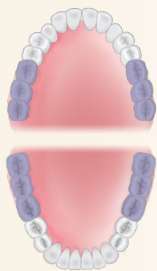

More Comfort, Less Fatigue:

An instrument that is always sharp means only light pressure is needed to "plane" away calculus.

Maintains Its Original Sharp Edge:

These razor sharp edges start and stay sharp longer than any other instrument on the market.

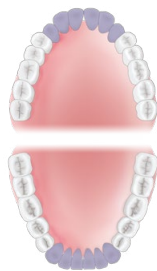

Thinner Blade Design: Since XP Sharpen-Free Instruments are sharpen-free, they are 10% thinner. This allows for easier access of periodontal pockets and interproximal areas.

EAGLE CLAW XP SCALER

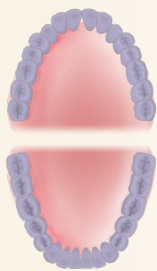

RDH Tip: This contra-angled sickle scaler has wonderful stability and control. Featuring a tip with cutting edges on both sides, it's ideal for supragingival deposits on posterior teeth. It also allows for excellent interproximal access.

EAGLE TALON XP SCALER

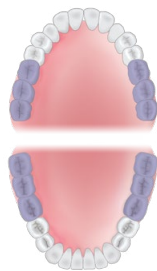

RDH Tip: This thinly tipped sickle scaler is a combination Jacquett 3 and Nebraska 128. It's ideal for removing calculus and stain in all anterior interproximal areas, making it a perfect complement to the Eagle Claw.

BLACKJACK XP SCALER

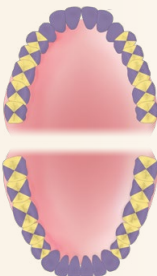

RDH Tip: If you love the PDT Montana Jack® or Hu-Friedy Nevi® 3 or Nevi® 4, then the Blackjack is for you. With an additional 4mm extension in the upper shank, it is a true universal sickle.

M23 XP SCALER

RDH Tip: Do you love a Barnhart 5-6 but wish it was a sickle? If so, you'll love the M23. With a longer terminal shank, you'll be able to access hard to reach interproximal spaces and adapt easily to posterior line angles.

DOUBLE GRACEY XP STANDARD

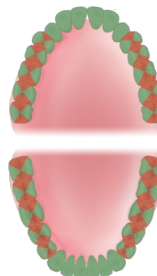

ANTERIOR AEDGAXPX

POSTERIOR AEDGPXPX

RDH Tip: These two instruments replace all standard Graceys, combining efficacy with true efficiency. Use the standard Double Graceys for sub-gingival calculus removal and root planing.

● DG ANTERIOR
● DG POSTERIOR

DOUBLE GRACEY XP MINI

ANTERIOR AEDGMAXPX

POSTERIOR AEDGMPXPX

RDH Tip: Featuring 50% shorter tips and 3mm shanks, the Double Gracey minis provide the ultimate efficiency and access into deep or narrow furcations and pockets.

● DG MINI ANTERIOR
● DG MINI POSTERIOR

	Average Lifespan	Maintenance	Ergonomics	Efficacy	Strokes
Conventional Scalers	6-12 months	Sharpen every 1-2 weeks	Abrasive "pop" off calculus	Tip reshaped during every sharpening	1,500 
XP Sharpen-Free Scalers	6-12 months	Never sharpen	Gentle "exploratory" shaving stroke	Retains original tip design	15,000 

Quik-Tip™ Customization

REDUCE WASTE & REDUCE COSTS

Designed with the hygienist in mind, Quik-Tips offer the ability to discard a single end when it becomes dull without having to replace your entire instrument, giving your practice significant cost savings, while eliminating unnecessary waste.

Quik-Tip cone socket benefits:

- Cost effective
- Reduces waste
- Easy to assemble
- Safe alternative to re-tipping
- Eight EagleLite handle options
- XP Sharpen-Free, XP Thin, and Talon Tough Stainless Steel tip options

XP® Sharpen-Free Thin

GREATER ACCESS AND VERSATILITY

We took the ideal instruments for periodontal maintenance, and made the blades thinner and the handles lighter. This provides you greater tactile sensitivity and increases access into periodontal pockets. Such a thin working end is only possible with XP Sharpen-Free Technology.

I no longer stress over my instruments being dull and not having time to sharpen. XP Instruments have taken that stress off my plate. I love having extra time to spend on other things, like my patients!

Innovative, Ergonomic Instrumentation

XP® SHARPEN-FREE TECHNOLOGY

Life is full of compromises but your hands don't have to be one of them. XP Sharpen-Free instruments only require a light exploratory stroke to effectively scale and root plane. A lighter grip, combined with less pressure and a lighter handle, result in an exceptionally ergonomic design.
