

See Your Way Clear to Mission and Margin with DigitalOptometrics.

Increase Access,
Improve Outcomes, and
Enhance Patient Satisfaction

Welcome to the Future of Eye Care with DigitalOptometrics.

As a Federally Qualified Community Health Center, your mission is to provide comprehensive, high-quality healthcare to underserved populations. DigitalOptometrics shares your passion for expanding access to essential healthcare services and improving patient outcomes. By integrating our advanced remote-care solution, your Health Center can offer state-of-the-art vision care, enhance patient satisfaction, and boost your clinical quality metrics, all while adding new revenue streams to your practice.

Vision care can influence HEDIS scores in several ways, particularly through its impact on preventive care, chronic disease management, and overall patient health outcomes. Comprehensive vision care can have a positive impact on HEDIS scores by improving preventive care practices, managing chronic diseases effectively, enhancing patient satisfaction, and ensuring better overall coordination of care.

Our process is designed to be seamless and efficient:

Remote Examination: Patients undergo a comprehensive eye exam in under 30 minutes, conducted by a licensed remote optometrist using advanced video conferencing technology.

Real-Time Analysis: The optometrist reviews subjective visual findings and remotely operates ophthalmic equipment to ensure precise results.

Immediate Prescriptions: Within minutes of concluding the exam, patients receive an accurate prescription, enhancing convenience and care quality.

By integrating DigitalOptometrics into your practice, you can provide uninterrupted eye care services, ensuring that your patients receive the early diagnostic screening they need when they need it.

About DigitalOptometrics

DigitalOptometrics is a groundbreaking software technology solution that empowers primary healthcare providers to expand their coverage and increase patient access to eye care. Our platform enables licensed optometrists to perform comprehensive eye exams remotely, in partnership with in-office technicians. Utilizing high-definition video conferencing and remotely operated ophthalmic equipment, we ensure that each patient receives a thorough and accurate examination in real time, regardless of their location.

Bringing Vision Care to the Underserved

Bridging the Gap in Vision Care

At DigitalOptometrics, we recognize the critical role that vision care plays in overall health and well-being. For many underserved communities, access to comprehensive eye care services is limited, leading to undiagnosed and untreated conditions that can significantly impact quality of life. By integrating DigitalOptometrics into your Health Center, you can bridge this gap and provide essential vision care to those who need it most.

Our advanced tele-optometry platform enables the early detection of serious health conditions, including Diabetes, Hypertension, Glaucoma, Cataracts.

Empowering Your Health Center

By offering D.O.'s comprehensive eye care services, your Health Center can:

Expand Service Offerings: Integrate vision care into your existing services, enhancing your ability to meet the diverse needs of your community.

Enhance Patient Access: Make eye care accessible to more patients, reducing travel barriers and increasing convenience while leveraging **D.O. Translate**, our instant voice translation capability enables practices to expand access to the 68 million Americans with limited language proficiency.

Boost Your Revenue with D.O.'s Comprehensive Eye Care Services

Unlock New Revenue Streams

Integrating DigitalOptometrics into your Health Center offers a significant opportunity to enhance your financial sustainability while continuing to serve your community. By adding remote comprehensive eye care services, your practice can tap into new revenue streams without the substantial costs typically associated with expanding healthcare services.

Revenue from Vision Care Services

By offering comprehensive eye exams, your Health Center can:

Generate New Revenue: Expand your service offerings and attract more patients seeking vision care, increasing your practice's top-line revenue.

Increase Patient Volume: Provide convenient, accessible eye exams that attract new patients and retain existing ones, leading to higher patient volumes and more consistent revenue streams.

Offer Additional Products: Enhance your revenue potential by offering frames and lenses, improving patient compliance and satisfaction while generating additional income.

Join the Vision Care Revolution with DigitalOptometrics

Expanding Vision Care Access

Transform your Health Center by partnering with DigitalOptometrics to bring state-of-the-art vision care to your community. Together, we can improve health outcomes, increase patient satisfaction, and fulfill the mission of providing comprehensive, accessible healthcare to all.
