

Emergency Water Preparedness Made Easy

During emergency situations like severe weather and natural disasters, clean water may be in short supply. We're here to help!

Meet Emergency Water Business Requirements:

The American Red Cross recommends to keep three gallons of water on hand per person. (One gallon per person for three days.) Facilities like hospitals and nursing homes should maintain an adequate water reserve supply, including operations that rely on water filtration systems.

Plans Tailored to Your Needs:

With an array of bottle sizes and case-packs, ReadyRefresh® can stock an on-site reserve inventory that meets your facility's needs.

Dedicated Support:

Your dedicated account manager is here to support you. Convenient self-service tools include customizable e-billing with flexible invoicing.

You're a Priority to Us:

As potential emergencies approach, ReadyRefresh® prioritizes water delivery to existing customers. Let us set up your memorandum of understanding (MOU) for emergency water delivery.
