

January 1st, administrative burden doubles. *Capacity doesn't.*

Elora helps frontline workers serve more people with real-time AI for documentation and case management.

Retroactive windows for adults shrinks to 30 days.
We help frontlines take immediate action.

$$\begin{array}{r} 2,000 \text{ patients} \\ \times \$200 \text{ PPS at 4 encounters/yr} \\ \hline \$1.6\text{M annual revenue at risk} \end{array}$$

We work with FQHCs and community health partners to help case managers and community health workers automate coverage and billing workflows—from live coverage checks to documentation—so they can spend less time on screens and more time with patients.

Expand frontline capacity to keep patients covered and supported.
